BRIEF BACKGROUND

Dr. Harvey N. Mayrovitz received his graduate training at the University of Pennsylvania and did postdoctoral work at Temple University School of Medicine and the Graduate Hospital in Philadelphia. He also trained at the Medical Faculty and Hospital in Rotterdam and at Delft University in the Netherlands. In 1998 he joined Nova Southeastern University where he is a professor of physiology in the College of Medical Sciences with an additional appointment in the College of Osteopathic Medicine. His research interests include skin physiology, lymphedema, wound healing, and more generally noninvasive clinical and biophysical measurements and processes to aid in diagnosis and therapy. He has authored over 150 full papers in peer-reviewed scientific and clinical journals on these and related areas.
